Farm-hand Seriously Injured

Wm. Nicholson, brother of Mrs. Wm. Brandon, met with a serious accident on Friday, when he was run over by a land packer on the farm of Lorne Wilson for whom he was working. He suffered a fracture of six ribs, a fracture of the shoulder blade, and a fractured skull.

He was removed to the General Hospital, Calgary, by Dr. Whillans, the x-ray revealing the injuries stated above.

Nicholson was driving four horses on the packer and stopped the horses and went up to the front of them to adjust something—it is all Nicholson remembers—it is thought that the horses took fright and in running away knocked him down, pulling the heavy packer over him.

Latest reports are that he is recovering.

Robertson Estate Sell Home Ranch

One of the largest land deals in this part of the country for some years was closed on Saturday, when Lloyd Smith of Beiseker bought the old home place of the Robertson Estate. This is the northern portion of the ranch, and comprises approximately 2300 acres, situated in the Municipal District of Beaver Dam.

Mr. Smith will take possession within the next ten days.

The Robertson Estate was one of the oldest in the district and was founded by the late Jimmie Robertson in 1887.

Liberal Organization Meeting

A meeting will be held in the Fire Hall on Wednesday evening commencing at 8 o'clock to which all who are interested in the Liberal cause in the Cochrane constituency are invited to attend.

Ontkes Building to be Altered for Squadron Headquarters

Lt. Col. F. J. Scott, V. D. and Major P. P. Littlewood will be in Crossfield shortly to arrange for some slight alterations to their squadron headquarters in the Ontkes building.

R. D. Sutherland will be glad to forward the names of any intending recruits to the commanding officer.

Local News

Cremona is holding a Stampede on May 24th.

The spring race meet opens at Chinook Park, Calgary on May 22.

Crossfield's annual celebration will be held on Dominion Day July 1st.

Don't forget folks its clean-up time, let's have the yards and alleys all nicely cleaned up.

The Wednesday half-holiday will not go into effect until the first Wednesday in June.

DIED—The death occurred on Tuesday of the infant daughter, (aged seven days) of Mr. and Mrs. H. J. Reeves.

Mrs. (Dr.) Gann of Huddersfield, England, arrived here on Wednesday to visit her sister, Mrs. S. H. McClelland.

The weather remains cold with an odd snow storm, and on Saturday we had a dust storm, which was bad enough, but nothing compared to the Oklahoma variety.

The regular monthly meeting of the Floral U.F.W.A. to have been held this week at Mrs. T. Fitzgerald has been postponed and will be held on Wednesday of next week.

Mr. and Mrs. C. Fox, Mr. and Mrs. E. Fox, Mrs. Fox, senior, R. M. McCool and J. Belshaw attended the funeral services of the late Mrs. Ellen Ward in Calgary on Wednesday. Messrs. C. and E. Fox acted as pallbearers.

Most of the men and boys who have been unemployed during the past winter have secured work on farms in the district, of course there are a few still loafing, who won't work as long as they can get by at the expense of somebody else.

Mr. Baker of the Crossfield Garage has been fortunate in securing the services of Mr. Bentley of Calgary to look after his repair shop. Mr. Bentley is an experienced mechanic and comes here highly recommended.

Social Credit Select Nominees For Cochrane Constituency

Constituency Convention Selects King, Reid, Wright and Beynon. Names Go Before Central Committee.

Four nominees from which a social credit candidate to contest the provincial constituency of Cochrane were chosen at a well attended social credit convention held at Mount View Hall, (west of Airdrie) on Saturday.

The nominees were J. Beynon, farmer, Cochrane; W. King, farmer, Lochend; E. J. Reid, farmer, Cremona; and E. R. Wright, school teacher, Airdrie. The four nominees will appear before the advisory committee and William Aberhart, leader of the party, when one of the four will be selected as candidate.

KING GEORGE V SILVER JUBILEE

\$136.50 for Cancer Fund

MORNING

The local populace awoke Monday morning to find Mr. Weather man had sent them snow and lots of it. While the weather was not what one would wish for a holiday it was extremely beneficial to the district.

Radios were in full swing and as reception was very good, all, had no difficulty in hearing the various items of interest, as well as the address of His Majesty King George V.

AFTERNOON

Owing to the inclemency of the weather, the day's outdoor activities had to be postponed, but to avoid disappointing the children a gathering was held in the U.F.A. Hall at 2 p. m. Monday afternoon. Addresses were given by Mayor Wood, R. M. McCool, M.L.A. and Rev. A. D. Currie.

At the conclusion of the meeting a child was given a souvenir button, and ice cream.

Resplendent in a new uniform our gaelen Constable Don Cameron, pinned the buttons on the children, and also saw to it that the children who were absent, the afternoon got a button the next day, when he visited the local school.

The buttons and ice cream were donated by the Village.

EVENING

Under the sponsorship of several interested townsmen, a concert and dance was held in the U.F.A. Hall Monday night May 6th. Proceeds in aid of the Silver Jubilee Cancer Fund.

The programme took the form of a Radio Broadcast, and proved more interesting than a straight programme.

Those who contributed their services for the good of the cause were as follows:

Mesdames, R. T. Amery, A. Stevens, A. D. Currie; Misses Lillian Johnson, Margaret and Kathleen Fitzpatrick; Vern Rogge, Genevieve Metherall, Winnie Fredaway, Violet Currie, Q. Cartwright, Anne Cameron; Messrs P. L. Johnston, D. Fleming, Fred Stevens, Max Grant, H. R. Fitzpatrick, Jack and George Fleming, Warren Hall, Ken. McCrea.

Addresses were given by Dr. D. W. Whillans and Rev. A. D. Currie. Glen Williams and G. Y. McLean acted as announcers, and H. A. Bannister was the station engineer.

After the programme the floor was cleared and dancing indulged in to the music of Gloom Chasers. D. W. Carmichael was in charge of the dance.

SUMMARY

The sponsors of the days activities are grateful to all those who helped in anyway to make the day a success, and also to the management of the Hall and the Gloom Chasers for their part in the days doings. Thanks is also tendered to Miss Stella Gordon, Miss Anne Cameron and Miss Margaret Fitzpatrick for their assistance as collectors.

The total sum realised from all sources: subscriptions, concert, dance, etc. is as follows:

Concert and dance \$69.75
Subscription List 55.75
Crossfield School 11.00
\$136.50

BUY YOUR OWN SIZE

They won't Shrink

Now you can buy your own size and be comfortable from the first time you put on a pair of Walker Trainmen Overalls, a Work Coat or pair of Work Pants bearing the "ZERO" label—right on through a dozen washings.

MAGOG ZERO SHRUNK

This label guarantees that the shrinking has already been done—that, no matter how often the garment is washed, it will not shrink out of fit—that it wears longer, fits better and looks better. Extra roomy to allow free and easy movement—properly pocketed for easy access and carrying of tools. Patented Nu-Way Suspenders—greater freedom of movement and there is no rubber to rot.

WALKER TRAINMEN OVERALLS

Red Back Bib Overalls, per pair \$1.75
White Back Bib Overalls, per pair \$2.15
Red Back Overall Pants, per pair \$1.55
White Back Overall Pants, per pair \$1.80

Confidence

Confidence is the bedrock on which human society rests. The entire world in all its varied activities is motivated by confidence. Destroy confidence and our civilization would disappear. It has been long accepted as a truism that there is in life but one absolute certainty, which is death. And, says one writer, all other activities, to a large extent, are dependent upon confidence for their being.

There is no word in our language that is more powerful in its full meaning, one that carries with it so practical an agency to accomplish our desires or to transmute our hopes into realities than that of confidence. It has been said that it is a plant of slow growth. Yet it is one that can be nurtured by individuals and groups of individuals and brought to full fruition with little effort. It is akin to faith in that faith in a particular proposition can be made an actuality by confidence. It is in a measure a question of application. Sometimes it is an outgrowth of reason, sometimes instinct, but however acquired it is, as stated in our opening sentence, the bedrock on which human society rests.

A home is established on confidence, the confidence a man and a woman have in each other which begets respect and love; confidence which children have in their parents; confidence which parents seek of their children and in turn which they repose in their offspring. Lacking confidence, a home would be impossible.

A successful business can only be built up and maintained where there is confidence, the confidence which one partner reposes in another, which the shareholders have in their managing executive, which an employer expects of his employees, and which employees have for their employers, and finally which the business man has in his customers and his customers possess for him. Lacking such confidence, a business will inevitably end in bankruptcy.

So, too, is the life of the community founded in confidence. First there must be confidence that there is a future for the community or there will be no community because people would not remain to constitute one; people who constitute the community group must have confidence in the goodwill, ability and enterprise of their associates, otherwise confidence in the community itself would be lacking. And what is true of the community is true of the nation.

It is not only essential that the citizens of a community or nation possess confidence in themselves and in each other, but it is vitally necessary that other communities and nations repose confidence in them if they are to achieve the greatest success and rise to a proud place in the world. When confidence between peoples and nations is lost, the world is headed for trouble.

Furthermore, when a community or nation assumes an attitude or adopts a course of action which results in a withdrawal of confidence from it, such community or nation is bound to be the sufferer. Once a man breaks faith with another he destroys what, after all, is his greatest asset, the confidence which his fellow men repose in him. It may have taken a long time to win the confidence of others, but by one act it can be quickly destroyed and forever lost. And if a community, built up as communities are by the confidence that people have given to them, proceeds to evade its responsibilities and repudiate its obligations, it thereby destroys its most valuable community asset.

A dollar bill is only valuable because of the confidence which the public has in the Government or bank issuing the bill; lacking such confidence the piece of paper would be utterly valueless. If a pupil lacks confidence in his teacher, the teaching will be largely vain. The sick patient's confidence in the doctor is half the battle to a successful recovery. Lacking confidence in the safety of the track, or bridges to be crossed, of the dispatcher at the telegraph key, the trained engineer in the locomotive cab, few people could be induced to undertake a railway journey.

Let the reader consider what his or her own position in life would be if they lost all confidence in their fellow citizens, in the institutions of their nation, in everything animate and inanimate which surrounds them. They would become fit inmates for a madhouse. Without confidence mankind simply could not continue to exist.

Notwithstanding this great truth, the fact remains that throughout the world to-day organized efforts are being put forth to destroy confidence in practically all things. Men and women are asked to place no confidence in the existence of God, to abandon their formerly held religious beliefs, to reject forms of government which it has taken centuries to develop, to surrender confidence in themselves, their convictions, abilities, initiative and energies, in a word, their individual liberties, and because they no longer have confidence in themselves, to become mere cogs in an economic and political machine operated by forces over which they will have surrendered all control.

Loss confidence in yourself and you destroy yourself, because with loss of confidence there is loss of self-respect, loss of self-control, loss of ambition, loss of initiative and the power to do.

A Whale Of A Shark

The largest shark ever caught in South African waters was trapped in a fisherman's net at Hout Bay, near Capetown. It was 27 feet 6 inches long, 12 feet in girth, and weighed five tons. It fought madly for freedom for two hours before it was finally hauled into shallow water. Even then 14 bullets were needed to kill it.

Moving Church Uphill

To make way for the replanning of the city, the ancient church, Belvarosi Tempion, in Budapest, Hungary, is to be moved 16 yards uphill. It will be eight yards higher in its new position. Special machinery for the operation has been invented by Lajos Fridrich, a well-known engineer. The moving will cost \$250,000.

Exhibition in Belgium

Big Fair in Brussels Bid For World Peace

Belgium's gesture to the cementing of the peace of Europe is an International Exhibition opened at Brussels, April 27. Amid the tumult and shouting, the talk of impending conflict of nations and the strivings for peace, Belgium projects her "World's Fair" in the hope of forwarding the friendship of nations and helping to re-establish the business of the world on a firmer basis.

With 400 acres of grounds and 150 palaces and pavilions the promoters have planned to make the exhibition the shop-window of the nations. Practically all countries of the hemisphere have places in the great show.

Science and technology, commercial exploitation and industrial development of the great modern discoveries are special features of the exhibition.

Celebration of the centenary of the first railway line and the first train between Brussels and Malines in 1835 furnish an opportunity for giving special attention to transport and means of communication.

In the departments of historical development, commemoration of founding of the independent state of Congo has given this section an impetus.

Ancient and modern art, domestic and foreign, is housed in special buildings. With its many art treasures, Belgium was one of the most reputed centres, together with sculpture, pottery and lace.

Figures Are Interesting

Statistics Show Important Place Occupied By Canada's Railways

The place which Canada's railways occupy in the Dominion's affairs is strikingly shown in some statistics recently released. Last year 66,626-

00 tons of freight were transported by Canadian railways and 17,952,000 passengers travelled on their trains. The total payroll of Canada's railways for the year amounted to \$141,078,000 paid to an average of 119,000 employees. The railways are one of the largest employers of Canada's coal output. Some figures in this respect covering Canadian National lines show that out of every dollar of the \$151,936,078.56 spent last year in operating the railway, approximately 10 cents went for fuel. The fuel bill for locomotives amounted to \$14,705,092.33 for the year; the water bill amounted to \$893,700.04. Approximately 60 cents out of every dollar of expenses went for labor.

Information as to commodities handled over Canadian National lines throughout the year gives a side-light on the extent to which Canada's mining industry has grown. Products of the mines constituted the largest portion of the total revenue tonnage, 12,092,546 or 32.7 per cent. Agricultural products account for 23.1 per cent, forest products 12.2 per cent, animal products 2.7 per cent, miscellaneous 29.8 per cent.

Girls Are Best Spellers

Work Harder Than Boys Opinion Of Toronto Teacher

Girls are better spellers than boys "probably because they work harder," G. H. Dickinson, teacher at the Central High School of Commerce, Toronto, says. Mr. Dickinson has just completed a survey of the spelling of 16,000 Canadian children which he will present to the commercial section of the O.E.A. "Bourgeois" was the word which the children found hardest to spell," he commented. "The easiest, we found, was 'accordance.'" The survey, he said, showed that pupils in commercial schools are better spellers than students in academic and technical schools.

An Old Idea

Aristotle once counted the teeth of his housekeeper and those of a male servant. He found four less teeth in the mouth of the woman, and for hundreds of years it was taken for granted that men had four more teeth than women.

1,000 pounds of shelled popcorn. Mount Ararat, on which Noah landed the Ark after the great flood, is now more than three miles above sea level. 2087

In Bed With Neuritis Every Winter

Until Kruschen Brought Relief

"For three years," writes a woman, "I have been sick in bed about three months every winter with neuritis in my hips and legs. Last winter I started taking Kruschen Salts, and got relief from the first dose. This winter I have not been in bed at all."—(Mrs.) D. M.

Neuritis is a result of impurities in the blood. And it is impure blood, circulating all over the system and setting up inflammation in the tissues, that causes those excruciating pains. Kruschen Salts can be safely trusted to set the matter right. Because Kruschen contains just what Nature needs to persuade your interior organs back into a healthy, normal condition.

Took Part in Convention

Blind, Crippled Child Astonishes Delegates With Her Skill

Kindness which all good school teachers feel towards children came readily for Lucille Kemp, a little blind and crippled girl from Tavistock, Ontario, who took an important part in the public school department's session of the Ontario Education Association's convention held recently in Toronto.

Lucille was brought by her parents, Mr. and Mrs. John K. Kemp, especially for the occasion. In the shiny pink frock she evoked the kindest of attention as she was carried onto the stage by her proud father. But when she began to give her number, admiration and sympathy went together in the hearts and minds of delegates who proudly saw in the child's artistic and skillful demonstration an example of what a home instruction unit under the auxiliary classes department of the Ontario Department of Education had been doing for physically handicapped children.

Lucille played her harp for an audience which applauded her when she was through. With excellent expression in her pleasant voice she recited a poem which she had written. While the delegates, with rapt attention, watched her cheery, earnest face, she wrote a business letter on a typewriter with a Braille keyboard. Using a relief map of the British Isles she gave her audience a lesson in geography.

Necessity For Canada

Control Of Wheat Supply Needed States British Economist

Regulation and control of wheat supply is a necessity for Canada, and other dominions exporting wheat to Great Britain as Britain's population is no longer increasing and her wheat demand is stationary, Sir Josiah Stamp, noted British economist, stated at Montreal.

Chairman of the London, Midland and Scottish Railway and a director of the Bank of England, Sir Josiah was in Montreal while en route with Lady Stamp from Quebec to New York on a combined business and pleasure trip to the United States.

Sir Josiah, who headed a royal commission on the Canadian wheat situation a few years ago, hoped any increased business to the Canadian wheat farmer as a result of the United States' dust storms would not start him increasing acreage and crop production under the impression the benefits would be permanent.

Popcorn seed imported into Canada from July 1, 1934 to March 1, 1935, amounted to two pounds only. During the past winter local growers at Magrath, Alberta, marketed over

Although far south of the Arctic Circle, part of Labrador's coast is made essentially Arctic in temperature by cold ocean currents.

The Mauretania Retires

Launched in 1906, This Vessel Covered 1,500,000 Miles During Its Years Of Service

The Cunard liner Mauretania, which has just been retired, was planned to be the fastest ship in the world, and not only won this distinction, but kept it for 23 years.

The Mauretania was built at the shipyard of Swan, Hunter and Wigham Richardson, at Wallsend, near Newcastle-on-Tyne, England, and was the first ship to have quadruple propellers.

The hull was launched on September 26, 1906, the Dowager Duchess of Roxburgh performing the launching ceremony. The ship's final trials took place on November 3, 1907, and she started on her first voyage to New York on November 16, 1907, making the crossing in five days, five hours and 10 minutes, and thus breaking all existing records at that time.

As late as July 1933, the Mauretania, on her way from Havana to New York, covered 112 miles at an average of 32 knots, or 36.84 land miles per hour. This record was made between Cayrystoff Reef Light-house and Jupiter Inlet Lighthouse. The Mauretania had steamed fully 1,500,000 miles, including more than 300 voyages across the Atlantic, scores of cruises, many of them to the West Indies and South America, and scouting and troop-carrying during the war. Her mileage was reached around the world twenty times. During her career she carried approximately 250,000 passengers. During the war she transported upward of 70,000 soldiers.

The Mauretania was named for a former Roman province in Northern Africa.

Grading Of Print Butter

Will Shortly Be In Effect All Through West

Grading of print butter will soon be an accomplished fact in Western Canada. Hon. D. G. McFadden, Manitoba Minister of Agriculture, has announced that the grading of creamery print butter sold in that province will go into effect June 1, enabling legislation having been passed recently by the province. Similar regulations are understood to have gone into effect in British Columbia and Alberta on May 1, and in Saskatchewan on June 1.

At the present time, under the Federal Dairy Industry Act, regulations provide for the grading and sale of all butter, whether in boxes or in pound prints, as only first, second, third or no grade, whereas formerly only such butter as was going on export or into storage was so graded. Under additions to the act last year provision was made for compulsory print grading, and the western provinces have been the first to pass enabling legislation.

The Most Precious Thing

It time be of all things most precious, wasting time must be the greatest prodigality, since lost time is never found again; and what we call time enough always proves little enough. Let us then be up and doing, and doing to a purpose, so by diligence shall we do more with less perplexity.—Franklin.

Find Petrified Forest

Discovery of a petrified forest dating from a prehistoric age on the slopes of the Adair mountains in Telfia, Russia, has been announced. Professor Vinogradov of the Tiflis forestry institute, who made the discovery, said he found trunks of many different species of trees, some of gigantic proportions.

Chlorophyll, the green coloring matter in plant leaves, apparently is the only means by which solar energy is made available to the plant.

Old Smokes at Home!

"All up and down the whole plantation, gladly they roam!" — choosing the young, sun-drenched leaves for Ogden's Cigarette Tobacco: Leaves that cannot pass the Ogden's quality test are kept "far, far away" from this mellow, satisfying cigarette tobacco: That's why we can promise that Ogden's will satisfy you — particularly when rolled with "Chantrelle" or "Vogue" Cigarette Papers.

Extensive Plan Of Beautification On Civic Lines Reflects Thrift And Enterprise Of Communities

Canada has been richly endowed with great natural beauty and, except where man in cities, towns, and villages has turned that loveliness into a semblance of garbage dumps, the land is a vista of endless charm. Just as a man is often judged by his clothes, so is a community appraised by its environment and that environment is at once the responsibility of every member of the community, individually and collectively. The home after all is the starting point for the most effective re-beautification of the spots despoiled of their natural grace, and, where each home is beautified, the fulfillment of a comprehensive scheme of beautification on civic or community lines is made a comparatively easy matter.

It's been amply proved by the success of the More Beautiful Canada campaign sponsored by the Canadian Horticultural Council a few years ago. The idea of beautifying the home surroundings had, in many places, only to be suggested to be acted upon, and now Canada possesses many more beautiful towns, villages and homes, some lovely but all the more lovely in their lowliness. The use of flowers and plants on the porches and walls of a house, in the gardens, and in adjacent spaces is not a matter of mere show. It goes deeper than that. In reality it strikes at the roots of civilization. Beauty represents the supremacy of the higher over the lower, of form over matter. So much so that, if the world were one beautiful garden and every inhabitant interested in it, there would be no more war. Every human being is influenced to a greater extent by his surroundings than is generally realized. Where there is harmony—and the harmony of flowers symbolizes the blending of the higher impulses—there can be no discord.

The story is the oldest one known. Adam was appointed to dress the garden of Eden and to keep it (Gen. 2:15). He did not do so and was sent out of the garden to till the ground. (Gen. 3:23). Children reared to love flowers have their hearts filled with love for beauty and thus have less room in their hearts and minds for the things that hurt and destroy.

Still another point of view, the progressiveness and thrift of a community or municipality are often reflected in its appearance, and, while the Dominion is stressing the importance of the influx of tourists, the best advertising that any community can do is to present a pleasing appearance. In the matter of what are the most suitable flowers and plants for the district, information will gladly be given by the nearest cultural college, or the Experimental Farm of the Dominion or Provincial Department of Agriculture.

Encourage Young Artist

Paints And Brushes To Be Sent To Apprentices At Northern H.R. Post
A set of artist's paints and brushes will be sent to Stanley C. Knapp, 20-year-old English apprentice in charge of the Hudson's Bay Company post at Clyde River, by trustees of the national gallery of Canada in recognition of his natural talent and inventiveness. Clyde River is 500 miles north of Frobisher Bay, northern Baffin Land, N.W.T.

Last year Knapp presented H. S. Southern, chairman of the board of trustees of the gallery, with an oil painting of the company post at Frobisher Bay, executed by him with brushes made from hair out of his own head, and painted on cardboard with common house paint. The gift was brought down by Major D. L. McKend, commander of the Canadian government Arctic patrol.

Started An Argument

The report of a Canadian National Telegraphs despatcher on a line break near Belleville, Ont., has started an argument among naturalists. It told how two lads chased a beaver up a tree and had to cut the tree down, snapping the wire in the fall. The despatcher confirmed his report in spite of the contentions beavers can't climb trees and even if they can, the boys could have climbed after the animal.

Federal Appointment

Harvey Dennis Sparling, Portage la Prairie, has been appointed official receiver under the Farmers Creditors Arrangements Act, for the central judicial district of Manitoba, Finance Minister E. N. Rhodes announced.

Results Are Remarkable

Cotton And Silk Fibres Made Stronger Than Iron

Silk and cotton fibres surpassing metal in tensile strength and offering a key to better wearing qualities were reported to the American Chemical Society at New York.

This strength was found during examination of "giant molecules" in a Swedish centrifuge at the Du Pont Company laboratories. The centrifuge is an indirect microscope which spins its contents at hundreds of revolutions a second so the minute parts are separated and their size can be calculated.

The experiments were reported by Dr. Elmer O. Kraemer and William D. Lansing.

In the centrifuge the molecules of silk and cotton show a beanpole structure. They are very long and narrow.

This explains their tensile strength. When they are lined up so that they lie parallel the atomic electrical forces of attraction hold them together much as if they were cables.

When silk fibres are lined up in this way, they show a tensile strength of 32 to 35 tons a square inch, and cotton, 20 to 31 tons. The tensile strength of cast iron is 6½ to 17 tons.

Anxious To Have Vote

Uneducated Women In Ceylon Learning To Read And Write

Mothers and grandmothers in Ceylon are going to the village schools, struggling to learn to read and write so that they may exercise the right to vote, members of a Montreal women's club were told by R. C. Bingham.

Five years ago, he said, when Ceylon attained self-government, the women began to take great interest in the affairs of the country. They have the franchise but must be able to read and write their own language. To-day 600,000 are qualified to vote.

FASHION FANCIES

QUICKLY FASHIONED

Ellen Worth offers pattern of this adorable model, distinguished by its perfect tailored simplicity. Style No. 807 is designed for sizes 14 to 18 years, 36 to 40-inches bust. Size 16 requires 3½ yards of 39-inch material with ¾ yards of 35-inch contrasting.

Patterns 20c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 375 McBurney Ave. E., Winnipeg.

The Spring Fashion Magazine is better than ever. Entirely illustrated in color you will find it a very stimulating fashion edition. There are clothes for cruising and clothes to brighten the lives of stay-at-homes. Many delightful little models for the smaller members of the family. Of course, patterns are obtainable for the designs illustrated. Send for your copy to-day, the price is 20 cents.

The goodness of some people is exceedingly tiresome. 3097

CHARMING STUDY OF HAPPY ROYAL COUPLE

This happy informal picture shows Princess Ingrid of Sweden with her fiance, Crown Prince Frederick of Denmark. This royal couple's engagement was announced recently.

For Grasshopper Control

Experiment Made In Distributing Bait By Means Of Aeroplane

Aerial distribution of grasshopper poison bait was demonstrated at Lethbridge recently before a dozen entomologists of the Dominion and northwestern United States.

During a conference of scientists seeking best ways and means of combating the "hopper infestation," a biplane with Pilot E. Boffa at the controls, equipped with a "spreader" invented by Terrance Ingolsby of Lethbridge, and several hundred pounds of bait aboard gave a demonstration of rapid spreading of bait which greatly impressed the entomologists.

By means of the overfed spreader it is possible to spread the bait evenly over large areas very quickly at the rate of about 10 pounds to the acre, which is not possible by the hand method now used.

There is only one way to "robabilitate" the jobs. That is by reviving business to provide them with jobs.

The nature of space is a problem that has been discussed almost from the beginning of metaphysical speculation.

Nothing To It

Spring Fever Just Means Lack Of Fresh Air

If you observe symptoms of Spring fever—for instance, a strong tendency to take the afternoon off—you may dismiss it with a yawn.

"There's nothing to it," said Dr. Morris Fishbein, of Chicago, discussing the old idea that "Spring fever" has some foundation in physical fact. "Chiefly, it's just an ailment."

In there anything to the time-honored theory that the blood gets too thick in winter, causing the common feeling of indolence when spring arrives?

There's not the slightest evidence that it is so," said Dr. Fishbein, editor of the Journal of the American Medical Association. He offered this practical explanation of why spring fever patients suffer a strong impulse to yawn or sleep: "Probably they forgot to open the windows."

Lumber Mills Busy

As a result of a brisk demand for lumber, planing mills in White Court, Alta., did not miss a day during the past winter, running on full time schedule—the first time since 1929. A large amount of lumber is being shipped from there daily.

THE SNAPSHOT GUILD

SUGGESTIONS FOR SPINNING PICTURES

"Don't forget the youngsters when you are taking snapshots"

Here's a chance to again set "environment" in your pictures. The young lady pictured above is in an ideal setting to "show off" her suit (and good looks) and at the same time the result is a most attractive snapshot—typical of springtime.

The suit, the girl, or the picture would not be half as attention-compelling if the picture had been taken with the garage door, the dark trunk of a tree or some other unattractive object as a background.

If your background is attractive and will add to the appearance of your picture use a small aperture or diaphragm opening. This will not only increase your depth of focus but bring out sharper details. If you stop down to f11, or f16 you will, of course, have to adjust your shutter speed accordingly, depending on the amount of light you have to work by. Don't try to take your pictures at less than 1/250 of a second unless you can place the camera on

something solid for otherwise, unless you know from experience that you can hold your camera steady through 1/15, 1/10 or 1/5 of a second, your picture will be blurred.

Remember, too, that the grown-ups are not the only ones who have new spring clothes. How about the youngsters? Little Jane (above) is surely getting a great thrill out of the new dress.

The season offers countless opportunities for interesting, story-telling snapshots. There is the plant you gave mother, or the beautiful white Easter lilies or the baby chicks received by little Jane from her grandmother; and innumerable other subjects. All you need do is give a little thought to the picture possibilities and at the end of the day you will have a collection of snapshots that you, your friends and family will be proud of and enjoy for years to come.

JOHN VAN GUILDER

Develop Intricate Machine That Is Claimed To Be Able To Solve Numerous Difficult Problems

Accumulate Estate

Dionne Quintuplets Prosper Financially During Brief Career

An estate valued at \$151,187.29 has been accumulated for the Dionne quintuplets in the period July 26, 1934, to March 31, 1935. This figure was revealed in the surrogate court of the district of Nipissing by H. R. Vatin, solicitor for the former guardians of the five little sisters.

Tabulated the estate consists of contracts valued at \$114,750; cash in bank, \$15,728; D'Arco hospital, \$9,112; province of Ontario bond, \$10,000; gifts, \$1,596.

Gifts varying from fire extinguishers to frying pans, were sent to the famous babies during the period in which the now retired guardians held sway. In addition to this the hospital was built and equipped by moneys and donations obtained through the efforts of the guardians.

Contracts which are still due will bring in \$114,750. They include Carnation Company, Ltd., Toronto, \$2,000; Pathe News Incorporated, New York, \$90,000; Gordon V. Thompson Limited, Toronto, \$500; Merrill Publishing Company, Chicago, \$100; N.E.A. Service, Inc., \$3,650; Lehn and Fink Limited, \$1,000; George S. Dingle Limited, Toronto, \$15,000; Alexander Doll Company, New York, \$2,500.

Cash receipts in the period of July 26, 1934, to March 31, 1935, totalled \$30,590. Of this amount, The Toronto Daily Star paid \$4,598 (on a non-profit basis) for still picture rights in the eight-month period. For the privilege of taking moving pictures, Pathe News Incorporated paid \$7,974.

Cash disbursements aggregated \$14,862. These moneys were paid out for medical fees, legal fees, light and power, coal, food supplies, repairs, dentures, a well, petty cash, etc. For his services covering the period from the babies' birth until the end of April, Dr. A. R. D'Arco was paid \$2,200.

Dundonald Was Great Soldier

Had Plans To Re-Organize Canada's Militia 50 Years Ago

The Earl of Dundonald, who stirred the whole Canadian nation three decades ago by his energetic plans to reorganize the Canadian militia, died at the age of 82, after a brief illness.

A great soldier, who saw service in Egypt and South Africa before becoming general officer commanding the Canadian Militia in 1902, and years later proved himself a valuable assistant in conduct of Great War operations, Lord Dundonald came of a distinguished Scottish fighting family.

He will be remembered chiefly as the man who led the final advance into Ladysmith. He also rode across the desert with dispatches telling of the death of Gordon of Khartoum. In Canada he will long be known as the military man whose conflicts with politicians stirred the Ottawa, and London Parliaments.

Dundonald came to Canada in 1902 to reorganize the Canadian Militia. After a stormy time and his departure in 1904 when he was greeted enthusiastically by throngs of people in cities en route to Quebec, he wrote: "Persons living in England in the days of a commander-in-chief would have been astonished to hear of such a thing as political interference in a military force, but in Canada in 1904 this interference struck at the roots of all efficiency."

The Yukon-Alaska Boundary

As an aid in the effective enforcement of customs, immigration, and other regulations, the Dominion government has reserved from sale a strip of land 60 feet wide along the Canadian side of the Yukon-Alaska section of the International Boundary. On the Alaska side of the boundary, the United States government has reserved a strip of the same width through its public lands. The Yukon-Alaska boundary is 749 miles long.

The Latest In Shoes

Here's the latest invention to bathe the "corn-stepper-owners." A pair of shoes on exhibition at the Province of Quebec Safety Exhibition in Montreal has steel toes which can bear 150-foot-pound pressure and leave the owner still smiling. The breaking strain of the toecap is 4,000 pounds.

With 75,000 parts and \$60,000, the masterpiece of the engineering staff at the University of Pennsylvania has put together a "mechanical brain," an intricate mass of metal that knows all the answers.

The potentialities of the bewildering mass of whirling wheels, shafts, gears, mirrors, disc, ball bearings, et al, is upheld as limitless by its constructors, associates of the Moore School of Electrical Engineering of the U. of P.

Primarily an instrument of peace, the "mechanical brain" becomes a death dealing weapon in wartime, when it is so utilized to compute distances between firing points and targets, the most important detail of every gunner's task.

No longer will the captain on the bridge of a battleship have to be concerned with the speed of the ship, the drift, the velocity of the wind, the rotation of the earth, the strength of the charge, the shape of the shell, the humidity, the temperature of the air—and all else that must now be considered before the firing of a thousand shells.

All the above calculating will be done—and more accurately—by the mechanism of the new machine.

Prof. Charles DeV. Fawcett, of the Moore school, explained that if a battleship's broadside now strikes its target twice out of ten attempts, with the assistance of the "Mechanical brain" it will hit the target at least five times, and very likely more often.

Both the army and navy have kept in close contact with the construction of the machine, built with CWA funds. It is the largest instrument of its kind in the world today.

"Although I hesitate to forecast the future," Fawcett said, "I am convinced this machine has extraordinary possibilities for good. It will be of use in the commonest ways."

"By solving the mathematical problems that are the basis of so much scientific development, it will be helpful among other things, in radio, television, hydraulics, aerodynamics and the generation of steam. It will be immensely valuable in the automotive field."

As an example, the professor put the three ton giant through a few paces. He geared it to solve a problem known as Vander Pol's equation, of use in radio engineering.

This equation, Fawcett pointed out, can be solved only with the greatest difficulty by mathematicians with a large margin for error. To the "mechanical brain," it was child's play. In jig-time the machine, using only a small part of its involved workings had the answer—and with no mistakes.

The machine is approximately 28 feet long, six feet wide and three and one-half feet high. The first one of its kind was constructed at the Massachusetts Institute of Technology by Dr. Vannevar Bush, but it has only four gears, in contrast to the ten on the one in Philadelphia, and the gears gauge its range.

The university plans to place the machine at the disposal of American industry.

Japan's Trade With Canada

Is To Be Regulated By Committee Of Experts

The official trade council of Japan has appointed a committee to regulate trade with Canada. In this connection it was said last year Japan purchased from Canada \$15,400,000 in goods while Canada purchased Japanese merchandise valued at \$2,240,000.

The trade council, consisting of experts of the ministries of finance, foreign affairs and commerce, decided to apply a system of control over imports and also to introduce safeguarding measures against countries which impose severe restrictions against Japanese imports. These take the form of increased tariff or restrictions, even prohibition of imports.

Millions Illiterate

According to statistics compiled by the Nanking government, China has at present a population of 436,094,633 people, among whom only 67,218,980 are educated, while the remaining 348,875,952 are illiterate.

Him—"Say, do your eyes bother you?"

Her—"No, why?"

Him—"Well, they bother me!"

WORLD HAPPENINGS BRIEFLY TOLD

Immediate construction of 500 new
aeroplanes for military purposes will
be undertaken by Great Britain. It
has been authoritatively learned.

Mrs. Amy Mollison, premier woman
flyer, cracked up her new plane,
the first time she flew it at Croydon
airfield. She escaped with a severe
shaking-up.

Pilot Rosterguyeff and Student
Pilot Baulbut remained in the air in
a glider for 26 hours, 29 minutes at
Koktabel, Crimea, and claimed a
world's record.

Five men and a boy were seriously
injured when a bomb was thrown in
a crowd witnessing an Indian wedding
procession at Calcutta. No arrests
were made.

Women of the village of Broderick,
Sask., "which has had no crop for
several years," held a silver collection
ten and netted \$19.25 to swell
the King George V. silver jubilee
cancer fund.

Notification that 10,000 tons of
steel rails had been ordered from the
Sydney plant of the Dominion Steel
and Coal Corporation by the South
African government was received recently.

Sir Malcolm Campbell, who can go
almost as fast as he wishes at Daytona
Beach, Fla., was fined \$1 in
police court for exceeding England's
recently instituted 30-miles-an-hour
speed limit in building areas.

Stamps issued for the diamond
jubilee of Queen Victoria in 1897 are
still in circulation. Prince Albert post
office authorities report a letter with
the 38-year-old stamp passed through
the mails, mailed from someone in
the district.

Workers Donate 'Planes'

Nine Have Been Added To China's
National Air Force

Nine new airplanes, eight of which
were donated by employees of government-owned railways in China,
and one of the Overseas Chinese in
Java, have been officially added to
China's national air force. The eight
railway planes cost \$330,000 and the
one from Java \$130,000. More than
1,000 government officials and National
Party leaders and over 10,000
spectators were present at the Old
Ming Palace Airfield in Nanking
when Wang Ching-wei, president of
the Executive Yuan, accepted the
planes for China. He spoke of the
importance of the development of
aviation as a step toward national
consolidation in China. After the
planes had been christened and the
National and Party flags removed
from the machines Chinese aviators
gave a formation and stunt flying
exhibition.

Swimming Pool For Blind

An open air swimming bath, the
first of its kind, for the blind is in
the process of construction at the
Tegel lake, near Berlin, Germany,
where railings are being erected in
the water to safeguard bathers from
swimming out too far. It will be
opened in May. The example of Berlin
will be followed by other German
towns.

She: "No one understands me."
He: "No wonder; your mother was
a telephone operator and your father
was a train announcer."

QUIVERING NERVES

Little Journeys in Science

COBALT AND NICKEL

(By Gordon H. Guest, M.A.)
Cobalt and nickel are two metals
which play an important role in
modern civilization. They are usually
found together in ores which contain
iron, silver, and copper. In combination
with arsenic and sulphur. The world's
chief deposits of cobalt are located
at Cobalt, (Ontario) and in the
Belgian Congo, while the chief
mines of nickel are at Sudbury (Ontario).
The mines at Cobalt are also
rich in silver.

Both these metals are silvery in
appearance and take a high polish.
They are slightly heavier than iron,
and melt at a lower temperature.
Unlike iron, these metals do not rust.
Sheet nickel is used in the production
of all forms of dairy equipment,
and nickel powder is used in many
chemical industries.

The chief uses of both nickel and
cobalt are as alloy metals. When
alloyed with iron, copper, chromium,
silver, or with combinations of these,
they give alloys of a very wide
range of properties.

Nickel steel is very hard and
tough and is used for structural
purposes to make armor plate.
Nickel-chromium steel is harder
and is used for railway switch-points
and crossings. An alloy of nickel
and iron known as permalloy made
possible an increase in cable com-
munication from 600 to 1,500 signals
per minute.

Monel metal (87 per cent. nickel,
13 per cent. copper, 5 per cent. iron,
or manganese) and other alloys of
similar composition are tough, possess
high tensile strength, and do not
corrode easily. This property of alloy
is used where pleasing appearance and
resistance to mild corrosion are re-
quired, as in the construction of res-
taurant fixtures, washing machines,
and soda fountains. Rifle bullets have
about the same composition as Monel
metal.

Other alloys of nickel are resistant
to heat and are used in electric
resistors and in electrical insulators.
Nichrome (trade name) is a good
example of this type of nickel alloy.
Invar (steel with 36 per cent. nickel)
is an alloy which does not expand.

Metallic cobalt has no direct uses,
but its alloys, which are similar to
those of nickel, are of great im-
portance. The chief alloys are simi-
lar to steel (trade name), a cobalt-
chromium alloy, tungsten or molybdenum.
These alloys are very hard and are used
for cutting tools, especially for lathe
tools.

Provided For Islanders

London Solicitor Looked After People
On Tristan da Cunha

There is a great deal of romance,
and certain amount of disillusion,
perhaps, to be got out of being a
Robinson Crusoe in real life. Mr.
Glas, a Scots corporal in the Artil-
lery, was one of a garrison of eighty-
seven soldiers landed at Tristan da
Cunha—the loneliest island in the
world—when Napoleon was imprisoned
at St. Helena. He and two others,
when the garrison was taken off, de-
cided that they would like to live the
rest of their lives there. They ob-
tained the requisite permission. They
drew up a proper constitution, where-
by "no member (of the island com-
munity) should assume any
superiority whatever," and there they
stayed. Mr. Glas had a Creole wife,
and on which to get, shipwrecked
place on which to get, shipwrecked
the population gradually increased.
Bachelors were occasionally supplied
with a wife by a passing sea-captain.
But it was Mr. Douglas Glas, a staid
solicitor of Gray's Inn, who died a
short time ago at the age of 72, who
has had all of the romance and none
of the disillusion. Forty years he
has thought of Tristan da Cunha and
has played the part of Mercutio Pro-
vider to the descendants of William
Glas and his friends. Destroyers,
gunboats, and an occasional cruiser
on the South African station have
been told off from time to time to
take stores, boats, necessities of all
kinds to Mr. Glas's protégés, and
of late years even luxury liners
have made one or two pilgrimages to
the island. Just before he died he
left a most interesting collection of
documents connected with the origin
of the island community to the British
Museum. If ever one man played
the part of Providence to a group of
his fellows it was surely Mr. Glas.—
Country Life, London.

Creates New Fund

"There is no sadder sight in the
world than aimless and dissipated
youth." The man who has just said
that is a man of action—the Prince
of Wales. He is not confining his
sympathy to words. As a national
theatre-offering to the King's Jubilee
the Prince announced the creation of a fund to extend
the great work of all the important
voluntary movements which guard
the welfare of boys and girls at the
critical span between 14 and 18.—Man-
chester Sunday Chronicle. 2007

BUILT IN ADVANCE
OF TODAY'S NEEDS

Recipes For This Week

(By Betty Barclay)

1935 BROWNIES

1 cup sifted cake flour

1/2 teaspoon double-acting baking powder

1/4 teaspoon salt

1/2 cup butter or other shortening

2 squares unweetened chocolate, melted

1 cup sugar

2 eggs, well beaten

1/2 cup chopped walnut meats

1 teaspoon vanilla

Sift flour once, measure, add baking powder, and salt, and sift again.

Add butter to chocolate and mix well.

Add sugar gradually to eggs, beating thoroughly; then chocolate mixture and blend.

Add flour and mix well; then nuts and vanilla. Bake in greased pan, 8 x 8 x 2 inches, in moderate oven (350 degrees F.) 35 minutes.

Cut in squares; remove from pan and cool on cake rack. Makes two dozen brownies.

RICE A LA 1935

1 1/2 cups cooked rice

5 tablespoons sugar

1/2 cups whipped cream

1/2 cup nuts

1 teaspoon marshmallow

Mix cooked rice with sugar, fold in whipped cream, flavored with marshmallow. Chill. Serve in tall sherberts.

Sprinkle each serving with nuts and garnish with additional whipped cream and red cherry.

The World's Ice Box

Temperature in Oimekon, Siberia.

Goes To 163 Below Zero

The coldest place in the world, according to new Russian Arctic maps, is Oimekon, in the Soviet Republic of Yakut, Siberia.

The temperature there is reported to fall as low as 75 degrees below centigrade (103 degrees below zero Fahrenheit). Formerly Verkhnyansk and Yakutsk were considered the world's ice boxes.

The island of Jersey has systematically standardized its famous herds, prohibiting importation of any cattle since 1763, or about 40 generations of cattle.

When sleeping, woodpeckers hang head down by their claws.

THE CHORE GIRL

All Copper Pot Cleaner

Safe, efficient, will not rust or splinter.

Acts like lightning removing burnt-on food from pots and pans.

Use one today and see how it does your work.

YOUR HANDWRITING REVEALS — YOUR CHARACTER!

By LAWRENCE HIBBERT
(Grapho-Analyst)
(All Rights Reserved)

It would not be out of place for me to say a few words here about vocation and the various desires that people have for getting somewhere in the world. Many of my correspondents speak of "dabbling" in certain things. Some "dabble" in writing, others in something else.

You will never get anywhere if you "dabble". No matter in what direction your desires and ambitions are directed, you need to work hard and to devote concentrated and industrious effort towards its attainment. If you want to write stories, for instance, then get down to it, and write. Never keep me the need for. Remember Robert Bruce and the spiders. If at first your efforts don't meet with success, don't give up. That is the way to succeed. It may sound trite for me to write in this way, but believe me, it is usually the result of the world can be summed up in a few prosaic expressions—and my mind is not dreaming about the future, but set to work to make your own future. In other words, you need to cultivate more persistence, definiteness and will-power. Never mind dreaming about the future, but set to work to make your own future.

C.O.: You are too much of a procrastinator at present ever to get very far ahead with your writing. You need to cultivate more persistence, definiteness and will-power. Never mind dreaming about the future, but set to work to make your own future. In other words, you need to cultivate more persistence, definiteness and will-power. Never mind dreaming about the future, but set to work to make your own future.

Mrs. A.: I cannot see much real happiness for you, with your present husband. Not only is he a confirmed drunkard, as you state, but he has a very violent temper, and absolutely lacks self-control. His brutality to you, and to your children illustrates this, even if his handwriting were not so definite on the point. And his aggressiveness to stop and stare at other women shows that he is set on having his own way.

There is only one thing for you to do, and that is to carry on with the plan you speak of in your letter. A separation will be for the best of you, and will at least give your children a real chance in life—a chance which they do not appear to have under present circumstances. You are fortunate in being sufficiently self-supporting to be able to gain your freedom. I do wish you more happiness in the future.

Would you like to know what your handwriting shows about your character? Add perhaps you have some of the characteristics of a leader. To know the truth? Send specimens of the handwriting you want analyzed to me at Lawrence Hibbert, care of Winnipeg Newspaper Union, 175 McDermott Avenue, Winnipeg, Man. All replies to your queries will be mailed as quickly as possible. Please allow about two weeks for your reply to reach you, owing to the volume of mail that is coming in.

Headgear For Regents

British Army Order Designates
Busby For Full Dress

A British Army order, issued with a special view to the proper trapping for the King's jubilee, makes the busby the full dress headgear of all artillery corps, heavy as well as light, and also of the Royal Engineers.

The Royal Horse Artillery have worn the busby from time immemorial. It was the full dress headgear of the Garrison Artillery, before the Great War, were what was officially known as the "Helmet, Universal, Home Pattern."

The R. H. A. retain the black sabel skin busby with white ostrich feather. One of the leading seaplane under consideration is a Glenn Martin monoplane which would carry 46 passengers, a crew of six, and a load of mail across the 1,500 nautical miles separating Galway from Notre Dame bay, Newfoundland, in eight hours, 35 minutes. Mr. Glendinning also said a smaller seaplane constructed by Igor Sikorsky might be used.

An Important Discovery

London Doctors Find Snake Venom
Will Stop Bleeding

Important results have been achieved by Dr. MacFarlane, pathologist, St. Bartholomew's Hospital, and Dr. Barnett, curator of the reptile house at the London Zoo, in the use of snake venom to stop bleeding.

An Indian snake, Russell's viper, yielded the most striking results. Its venom diluted to one part in 100,000 causes blood coagulation in one minute.

Masks Are Costly

Masks for women, made in their own likeness, have become a craze among smart women on the Riviera in France. It is claimed that they wear their wearers to rest muscles wearied by a constant "fashionable" smile. Each costs a small fortune.

Iron wire has a tensile strength of 80,000 pounds per square inch; that of silk 64,000, says a writer.

SUNDAY SCHOOL LESSON MAY 12

THE CHRISTIAN CHURCH

Golden text: So we, who are many, are one body in Christ, and several members one of another. Romans 12:5.

Devotional Reading: Ephesians 2: 11-21.

Explanations And Comments

Life in the Early Church, Acts 2: 41-45. On the day of Pentecost about three thousand were baptized and became faithful members of the Christian community. They were steadfast in their attention to the teaching of the apostles, lived in wonderful unity and comradeship together, and shared in the breaking of bread and public prayers. The "breaking of bread" has reference to the blessing which was uttered at the beginning of a meal when the bread, which was in the form of thin, flat cakes, was solemnly broken for distribution.

It is the foremost of Christ made no effort to form any ecclesiastical organization. All that believed in Christ, they met in private houses, they used the Psalms for praise, they repeated the Lord's Prayer, and they met frequently, probably weekly, to partake of the Lord's Supper, which was followed by a church supper, partly for social fellowship, and partly to provide food for those in need. The one condition of their fellowship was love and loyalty to the Master; they lived without friction and vainglory, in an absolute, equal brotherhood. The rich shared their possessions with the poor, selling their possessions to provide funds for the latter as there was need. They were not only united but they acted under the urge of a fine community spirit, realizing that they were God's stewards and that their wealth was to be used for others as well as for themselves.

The church, as I understand it, is a living social and spiritual organism through which flows the life of the great Master Spirit of humanity, Jesus Christ. Each individual church is a branch of this Living Vine. The Church as a whole is the continuation of the Christ personality—his spirit and ideals. It is his living representative, his organ of expression, his channel of re-creation. (John Wright Buckingham)

Trans-Atlantic Air Service

Experimental Flights May Be Carried Out This Summer

Provided arrangements can be made for establishment of terminal aerodromes at Galway, Ireland; and in Newfoundland, experimental flights across the Atlantic will be carried out within the next six months in connection with the proposed Ireland-to-Newfoundland airmail and passenger service. C. H. Glendinning said large United States-built seaplanes would be used.

Ban On War Materials

France Decides To Forbid Export Of Needed Metals To Germany

A French decision to forbid exports of bauxite, raw material from which aluminum is made, served to emphasize difficulties the Nazis are having in their efforts for military self-sufficiency.

Determining to bring Germany back to the level of Europe's great powers, Adolf Hitler's aggressive administration is finding the marshalling of war materials more troublesome than the mobilization of men.

France's ban on bauxite shipments newspapers and experts pointed out, must seriously hamper the self-sufficiency program since Germany, producing no bauxite herself, has been buying half her supply of that material from France.

A further difficulty, it was asserted, is that Germany has devised an elaborate scheme for substituting aluminum for hundreds of more expensive metals, of which may be by the board unless other sources of supply can be found.

"I'll Tell Anybody Gin Pills are Good"

—writes a Lunenburg, N.S. man who had suffered from Rheumatism. He further states: "I cannot praise Gin Pills enough. After using them I am now able to go around without a cane."

If your kidneys are not efficiently disposing of the waste matter in your system excessive acidity may develop, resulting in painful joints, sciatica, lumbago. At the first sign of kidney trouble take

GIN PILLS
FOR THE KIDNEYS

GERMAN POLICY IS DEFENDED IN HOUSE OF LORDS

London.—Defence of German policy was voiced in the house of lords by the Marquess of Lothian and Viscount Esher in the course of a debate on treaty revision.

Lord Davies moved the government should take steps to implement article 19 of the covenant of the League of Nations by the establishment of a satisfactory procedure for effecting a peaceful change in the relationship of the states and for revision of treaties.

Most people recognized the treaty of Versailles was "somewhat severe," said Lord Lothian. Germany in the last 20 years had endured "terrible things." If there was to be peace, she must be given an appropriate place in the world.

Four questions must be decided, he declared—demilitarization of the Rhine area which could not last indefinitely; the question of Austria; the Polish corridor and the former German colonies. It appeared these issues must sooner or later be settled at a round table conference or modified in some more drastic way, he said.

Germany was not the only power which repudiated treaties, said Lord Esher.

"It is only a casus belli which can say that the sin of omission of which France and Britain were guilty were better than the sins of commission perpetrated by Germany, for Britain and France all along repudiated the treaty of Versailles in the sense of not having put into force the clauses to disarm. . . . Germany and Japan are expanding, dynamic nations. We ought surely to understand their viewpoint," he said.

Lord Davies' motion was finally withdrawn after Earl Stanhope, under-secretary of state for foreign affairs, had replied.

Britain had disarmed on land, at sea and in the air to a point which was generally considered unwise, the earl said. He expressed surprise it should still be contended Britain had failed to fulfil disarmament clauses. Referring to the question of revision of frontiers, Lord Stanhope said: "You cannot satisfy one nation with regard to frontiers without making another nation give up territory, and until you can get a greater feeling of friendship and confidence between the nations any procedure making for alteration of frontier is obviously one that will lead to more misunderstanding, difficulty and friction than if things were left as they are."

Pictures Of Quintuplets

Royalties May Bring In Large Sum For Dianna Fund

Toronto.—A million pictures of the Dionne quintuplets will grace 1936 calendars through an agreement announced by Joseph Sedgwick, of the Ontario attorney-general's department.

Arrangements were completed by a large lithographic company in the United States, the copyright holders of photographs of the babies, and Mr. Sedgwick, acting with the board of guardians for the little Dionnes.

Royalties which may amount to \$35,000, will be paid into the quintuplets' fund. The company's Canadian agents will hold rights in Canada.

Prohibit Importation

Two Books Of John Buchanan Not Allowed Entry On Account Of Copyright

Ottawa.—The department of national revenue sent notification to customs collectors that importation of two books by John Buchanan, Canada's governor-general-designate, has been prohibited.

The prohibition order was issued, the notification said, at the request of the publishers who have obtained copyrights under the Canadian act and do not wish copies of the works printed in other countries to be imported into Canada.

The books are "Foster John" and "Salute to Adventure."

Taken Off Relief

Toronto.—Controller Sam McBride charged at a board of control meeting that a man living in a \$20,000 house, with a butler, has been receiving relief. Welfare Commissioner A. W. Laver said the man, who had been living in the country and had given a wrong address, was taken off relief.

Seeding Late In Alberta

Will Be General Soon If Weather Is Favorable

Calgary.—Wind and weather being favorable, seeding is expected to be general through southern Alberta, from Red Deer to the border, within a few days, the latest in the past 14 years.

The late start, however, has not worried farmers. Moisture conditions are good, and what will have a better than even break against weeds and grasshoppers.

There is expected, according to reports gathered by the Calgary Herald, to be a large increase in acreage seeded to coarse grain and feed crops, particularly oats.

In some southern districts seeding is from 10 to 20 per cent under way. From Red Deer north to the Peace River there is virtually no seeding done, but work on the land is under way at a few points, according to The Herald reports.

Britain Not Worrying

Not Stirred Too Deeply By Germany's U-Boat Plan

London.—Great Britain does not intend to become stirred too deeply by Germany's building of U-boats, but will continue plans for the projected Anglo-German naval talks, it was authoritatively asserted here.

During the talks, which will take place probably after Chancellor Adolf Hitler outlines his foreign policy before the reichstag about May 15, Joachim von Ribbentrop, Hitler's personal arms emissary, will head Germany's special delegation, it was officially confirmed.

The cabinet, it was learned, will study these three methods proposed for dealing with this latest violation of the treaty of Versailles:

1. A protest to Berlin.

2. Intervention at Geneva.

3. Consultation with France and Italy, in pursuance of the agreements reached at the Stresa conference.

Drop Liquor Charges

Lack Of Territorial Jurisdiction Stated As Reason

Montreal.—Charges facing residents of the Maritime provinces of conspiracy to defraud the Dominion government of \$5,000,000 through liquor smuggling were dropped because of doubt of territorial jurisdiction and also because of expense, J. J. Penner, K.C., crown prosecutor, declared at a preliminary hearing of eight men on similar charges continued. The case is expected to close within a few days.

Those being tried are the four Bronfman brothers, Sam, Allan, Harry and Abe, Barclay, F. S. Elair and James Crankshaw, all of Montreal, and William Yule, Halifax.

Important Role

Prince Of Wales Makes Appeal For Support Of Jubilee Trust Fund

London.—The Prince of Wales will naturally assume an important role in the jubilee celebrations marking the 25-year reign of his father.

That was emphasized with the appearance of the official jubilee program of which the first page was devoted of an appeal from the prince signed in his signature "Edward VII" for support of the "King George's Jubilee Trust."

The trust, for which some \$20,000,000 is sought, will be used for young Britain—"To steady youth in its difficult days and strengthen its maturity."

Not Closing Camps

Ontario Not Shutting Down Relief Camps At Sudbury

Toronto.—Ontario government relief camps near Sudbury and Sault Ste. Marie are not being closed, Hon. Peter Heenan, provincial minister of lands and forests, stated here.

He pointed out that a number of men, including settlers who would have an opportunity to purchase their land, had been let out until the province learns from the federal government what contribution Ottawa is prepared to make toward works on trans-Canada highway project.

Short Of Small Change

Mexico, D.F.—Although \$60,000,000 pesos in new copper coins have been put in circulation by the Bank of Mexico, the shortage of small change for business transactions became more acute as silver money was surrendered to the bank in compliance with a government decree retiring it from circulation.

Germany's Naval Plans

Hitler May Decide To Shroud Intentions In Mystery

Berlin.—Adolf Hitler was believed in competent quarters to be planning to use Germany's naval re-armament to keep him in the "driver's seat" in arms negotiations with other powers.

It was thus these quarters expected the continued official secrecy concerning the extent of the reich's plans for naval construction, and the reiterated official denials that submarines actually have been constructed.

Commentators here said the fuhrer may decide to shroud his naval plans in continued official secrecy and approach the scheduled Anglo-German naval conversations reluctantly.

Commenting on reports from abroad that the reich already had six submarines ready for manoeuvres, one foreign naval expert said: "It is impossible to hide a submarine along Germany's coast—and what good would a hidden submarine be for such things as training?"

BRITISH FOREIGN POLICY SKETCHED FOR VISITORS

London.—An account of their conferences and conversations with European statesmen was given to Prime Minister R. B. Bennett and other heads of the self-governing Dominions by Prime Minister Ramsay MacDonald and Sir John Simon, secretary of the foreign office, at an informal gathering in the commons. A discussion followed.

The meeting occupied an hour and a half after which a communique was issued. The communique said:

"The prime minister entertained at tea the prime ministers of Canada, Australia and South Africa. The prime minister of New Zealand was unable to be present as he had not arrived in England. Several colleagues of the prime ministers were also present.

"An opportunity was taken to have an informal discussion of the present international situation in the course of which Mr. MacDonald and Sir John Simon gave an account of recent conferences and conversations with European states. Among the ministers present besides Mr. MacDonald and Sir John were Stanley Baldwin, lord president of the council; Neville Chamberlain, chancellor of the exchequer; J. H. Thomas, secretary for the Dominions; and Sir Philip Cunliffe-Lister, secretary for the colonies."

It is understood Sir John gave an account of the events of the last two months starting with conversations with the French government beginning in February, covering the German declaration of conscription, the Berlin and other visits, the Stresa conference and the meeting of the League council at Geneva. Mr. MacDonald also participated in the talks and the policy of the United Kingdom throughout these events was sketched.

It was gathered that the talk was definitely confined to international affairs and consisted very largely in the Dominion premiers asking and receiving information.

THE CHANCELLOR PREPARES HIS BUDGET

Here we see Mr. Neville Chamberlain, Britain's Chancellor of the Exchequer, preparing the budget which was so well received in the British House recently. A comfortable surplus was announced and taxation was cut to a very great extent.

AT KING'S JUBILEE

Rev. Sidney M. Berry, D.D., Moderator of the Free Church Council of England and Wales, who read the lessons at the service in St. Paul's Cathedral, London, commemorating the King's Jubilee.

Victims Of Dust Storms

Twenty Persons Die In United States In Past Two Weeks

Springfield, Colo.—Red Cross officials estimated "at least 20" persons have died within the past two weeks in the United States "dust bowl" of diseases aggravated by the blowing silt.

Albert Evans, in charge of Red Cross dust storm headquarters at Liberal, Kas., said nine have died in Baca county, Colorado, five in the Oklahoma panhandle, and six in southwestern Kansas.

He emphasized the figure was "conservative."

A 10th "dust belt" death in less than two weeks and a score more of emergency hospital patients were reported as new clouds of silt shadowed parts of New Mexico, Texas, Colorado, Oklahoma and Kansas. James Waite, five-year-old son of a farmer, died here of an illness which physicians said was aggravated by breathing dirt into his lungs.

Stand On Trade Parley

Canada's Basis For Discussion With U.S. Has Been Decided

Ottawa.—Canada's stand on the reciprocal trade negotiations which the United States government announced some time ago would be initiated after hearings had been completed in Washington, was practically decided, according to the best information available here. The nature of Canada's basis for discussion has not been made public nor are any developments expected for a matter of weeks, it was learned.

Hon. W. D. Herridge, Canadian minister to Washington, was in Ottawa recently. He was in frequent consultation with trade and external affairs officials and government tariff experts. No official comment could be obtained on the question.

Gift For University

Toronto.—President H. J. Cody of University of Toronto announced that the board of governors has accepted "with gratitude" a gift of \$3,000 from Dr. W. B. Hendry and Mrs. Hendry for the purpose of establishing a scholarship in obstetrics and gynecology in memory of their late son, William John Hendry, who graduated as gold medalist in medicine in 1933.

Kidnapping Charge

Dutch Police Investigating Activities Of Nazi Government

The Hague.—Investigation of the kidnapping of a German laborer named Gutzelt from Dutch territory was pressed by police as public opinion connected the case with the deportation of Major Witte, also a German, for carrying on Nazi propaganda in the Netherlands.

Government authorities emphasized, however, the two events were not connected. They also denied their relation to the reported kidnapping of a man named Eusebius who, it is said, was spirited across the border into Germany coincident with the Gutzelt disappearance.

The expulsion of Major Witte was ordered about three weeks ago by Dutch authorities, according to a report submitted to the lower house by J. R. H. Van Schaik, minister of justice. He added the Nazi agent had recrossed the border into Germany on April 22. He had been chief of the Nazi bureau in Amsterdam for over a year.

Jumps From Train

Wisconsin Convict Meets Death In Attempt To Escape

Ridgetown, Ont.—Preferring death to trial on forgery charges, William O. Reeves, 46-year-old convict from Waupun, Wis., leaped from a speeding Michigan and Central Railway train near here.

The body of the prisoner, being brought to Arlington, Mass., from Wisconsin state prison, was found mutilated on the railway tracks a few miles from here.

Reeves evaded his guard, Lieut. A. E. Ryan of Arlington, long enough to smash the small circular window in the train washroom and crawl through. The train was travelling at approximately 65-miles-an-hour as it passed this point, 15 miles northeast of Chatham.

REDUCTION OF INSURANCE RATES FOR H. B. ROUTE

Ottawa.—Reduction of 25 per cent on the extra premium payable on vessels to be insured into the Hudson Bay route will be effective during the 1935 season under a report of the Imperial shipping committee on Hudson Bay marine insurance rates. The report was made public simultaneously in London and Ottawa.

The decrease in rates for "suspension of the warranty," (or for suspension of the guarantee the insured vessel will not engage in certain defined trades which the underwriters regard as involving extra risk), will apply to insured vessels, with or without a gyro compass.

The advantage of a lower rate given to a ship equipped with a gyro compass, considered by the committee to reduce greatly the risk, is to be maintained. The schedule of rates are involved depending on tonnage, values and other factors.

No change is proposed in the date of the opening of the season, the report states.

The opinion of masters is that the lights in Hudson Strait are judiciously placed the committee finds.

After reviewing operations of the 1934 season, the committee commends highly the aids to navigation supplied by the government, the service rendered by the Canadian government steamship "N.B. McLean" and gives the following as a summary of salient facts for last year: (A) That 15 commercial voyages have been made practically without casualty in a very difficult season;

(B) That the aids to navigation supplied by the Canadian government have now reached a degree of efficiency they must be accepted as having very materially contributed to this result;

(C) That several of the masters who captained the ships have now made the voyage for more than one season and their experience and confidence may also be regarded as having contributed to the result. The report states the underwriters recognized that the aids to navigation, including especially the services of the two patrol vessels "N.B. McLean" and "Ocean Eagle" had rendered possible an immunity from serious casualty which was gratifying. "Had the bad season under review occurred in the first year after the opening of Churchill the present outlook for the route might have been very different."

ARMS TESTIMONY DISCLOSURES ARE REGRETTED BY U.S.

Washington.—Assuming "full responsibility for the unfortunate testimony" of the executive testimony incident," Chairman John McSwain told President Roosevelt of his great "regret" at the house military committee's disclosure of secret army testimony which stirred international concern.

Replying to the president's own stern rebuke and disavowal of alleged war plans touching friendly nations—Canada among them—the white-haired South Carolinian wrote the White House:

"I greatly regret the unfortunate inclusion of the executive testimony along with other testimony when it was sent to the public printer. . . . I can assure you that no such incident will again occur because so long as I shall preside as chairman, any testimony that may be given in executive session and that may affect our foreign or diplomatic relations will not be taken down stenographically. . . ."

Brigadier-General F. M. Andrews, chief of the general headquarters air force, gave testimony on the need of seizing nearby British and French islands in event of an emergency. Brigadier-General Charles E. Kilbourne testified regarding a "camouflaged" air base near the unfortified Canadian border.

With reference to the flurry over the proposal for an air base in the Great Lakes region, McSwain wrote:

"I have not recently read our treaty with the British government concerning the disarmament of our Canadian border line, but my personal recollection is that following shortly after the War of 1812 and much naval activity upon the Great Lakes, including the victory of Commodore Perry, this treaty expressly stipulated only against battleships or armed vessels upon the Great Lakes. "It was true then and has ever since been true that we had and continue to have several fleets, forts, and posts near or relatively near to our Canadian frontier, and these have never been in any way regarded as unfriendly gestures. By analogy, they might be compared with French fortifications along the Belgian border. They are maintained not against Belgium, but against what might come over and through Belgium, as has happened in the past."

Technical Agriculturists

Dean Shaw Of Saskatchewan University Elected President

Ottawa.—Dean A. M. Shaw, of the faculty of agriculture, University of Saskatchewan, has been elected president of the Canadian Society of Technical Agriculturists.

With the election, conducted by a mail ballot, other officers announced by the society here were:

Vice-president, Dr. W. H. Britain, dean of the faculty of agriculture of McGill University. MacDonald, Colleague, and M. F. N. Saville, chief of the administration branch, department of agriculture, Quebec; and honorary secretary, H. G. Crawford, Dominion entomological branch, Ottawa. The officials will take office at the close of the annual convention of the society already announced for Edmonton June 24 to 27.

Announcement also was made that Sir Francis Froude, high commissioner for the United Kingdom, will be the guest speaker at the convention. His subject will be "The Agricultural Situation in Great Britain."

For Polar Flight

Wilkins Looks For Pilots For Venturesome Trip

Toronto.—Sir Hubert Wilkins, explorer of the polar regions, was here interviewing air pilots with a view to finding a pair to accompany him and Lincoln Ellsworth on what may be the first non-stop 2,900-miles flight across Antarctica.

Only two pilots will travel with the expedition, which is slated to leave the United States early in October. Sir Hubert interviewed four flyers here, and will proceed to Winnipeg and talk to some more next week.

To Release Many Prisoners

Montreal.—Between 300 and 400 men and women prisoners in jails in the province of Quebec will be released as a result of the general reduction of sentences granted in celebration of the silver jubilee of King George. It is estimated by officials of the Prisoners' Aid and Welfare Association here.

Disease Being Conquered

Thousands Of Research Workers Experimenting In Wonderful Way

Wherever medical men are gathered there is news of discoveries in medicine. Barring the sciences in medical circles with which the general public never come in contact, are thousands of research workers in hospitals and laboratories all over the world, who probe and experiment in the most marvellous way for the cause and conquest of disease. Bit by bit, some of the most deadly ailments are being mastered, and it will only be a few years before diseases now fatal, will be preventable or curable. Unless new ones crop up mankind will eventually only die of old age.

Within the past few months meetings of medical men have been told of a new use for insulin in the cure of mental derangement, of snake venom to stop bleeding, creation of artificial fever for the treatment of tuberculosis, operative surgery for the cure of angina pectoris, artificial creation of cancer germs which will enable cancer to be studied from the start instead of after it is well established, an extract from pig kidney that has thus far cured Bright's disease in animals. And people have literally been raised from the dead.

But if people lived right, and if they would visit a doctor at least once a year for a general examination, many of these ailments would be prevented.—St. Thomas Times-Journal.

Depends On Individual

Life Is Usually Pretty Much What We Make It

The best things that we hope for are those which are most largely within our own power. We may not be able to forestall whether during the year the crops will have favorable weather, we may not know whether the particular business interests in which we are engaged will prosper or languish, but we do know that we have control over industry or energy, discretion or wisdom, we put into them will bear results. We cannot tell certainly whether uninterrupted health and peace will reign in our households, but we know that it will depend largely upon our obedience to the laws of the body and our faithful and loving care of and influence over those near and dear to us. We do not know the detail of our social life, what friends we may lose or gain, yet we know that faithfulness, loyalty, and usefulness on our part will ensure to us pure and happy social relations.

Russian Women Sailors

One Holds Position As Third Mate On Freighter

When the Russian freighter Kallan docked in Brooklyn recently a young woman in a peaked cap, a blue jacket with brass buttons and a blue skirt climbed from the bridge and asked what time the baseball game started at the stadium.

She was Miss Anna Tumina, 23, third officer of the vessel. There are three other young women in the Kallan's crew. They are Tchernichenko, a machinist and Maria Semenovna and Lidia Marchuk, stewardesses, each 25.

Miss Tumina, as third mate in boss of 30 men. She must stand watch at sea, shoot the sun for the ship's position every noon, keep a log and find work for the crew.

New Refinery Process

Promises To Save Millions Of Gallons Of Gasoline In The U.S.

A new refinery process promising to save about 25,000,000 barrels of gasoline annually to the United States, was reported to the American Chemical Society by V. I. Spatier, of the Universal City Products Company, Chicago. A catalyst turns into gasoline some of the petroleum not otherwise convertible.

Dr. A. C. Fieldner, chief engineer, experiment stations division, U.S. bureau of mines, predicted that oil reserves are diminishing so rapidly that the present generation may have to supplement its gasoline with substitutes made from coal.

Largest Canteen In World

The world's largest canteen was opened recently by the Princess Royal. It was at the Hudson Road mills of Messrs. Montagu Burton, Ltd. The canteen can seat 8,000 workers, and the kitchens can cook more than 10,000 daily dinners, which the employees are able to purchase for 10 pence. More than 10,000 employees are working at the factory.

BRITISH EMPIRE HEARS JUBILEE MESSAGE FROM THE KING

On May 6th, King George celebrated the twenty-fifth anniversary of his reign, and one of the important events on the happy day was an Empire-wide broadcast which culminated with a message from His Majesty from London. Here we see King George in his study during a world-wide broadcast. —Copyright, The Times Photo.

How Sound Travels

Some Facts About Its Transmission Are Very Curious

Most of us have said at some time or other: "The railway trains sound very close to-day—the rain cannot be far off." And in this observation we have been echoing the popular belief that there is a direct connection between the transmission of sound and the weather. Now researches carried on by meteorologists in England seem to indicate that this particular popular belief is no more accurate than most others.

There are some very curious facts about the transmission of sound. We are told, for instance, that sounds produced by explosives are sometimes heard at very great distances, when none of these sounds are heard at points comparatively close to the origin. Again, although the wind is capable of carrying sounds to a moderate distance, transmission to points remote by 100 miles and more is found to be independent of the weather.

By means of close investigation with microphones it has been proved that when sounds are heard at great distances, the energy has traversed the atmosphere at levels which reach a maximum height of 25 miles. And there the air is warmer than on the ground.

In this connection, it was found during the world war that the firing on the western front could be heard in Great Britain only in summer and that at similar distances in Germany it was heard only in winter. This consistent alternative proved to be due to the change of the prevailing wind in the upper atmosphere, which at a height of 12 miles was generally from the east in summer and from the west in winter.

Meteorologists claim that the reversal is connected with a great range of temperature in the upper atmosphere over Arctic circles during the course of the year. But they have yet found no satisfactory explanation of the high temperature which prevails in the upper atmosphere at all seasons, it is said, from pole to pole.

Pets Must Be Killed

Despite hundreds of letters petitioning for adoption of four prize-winning Boston terriers condemned to death in the will of their late owner, Mrs. Mabel A. Roman of Quincy, Mass., the dogs will be executed as soon as the executor of the will, Frank H. Mason, brother of Mrs. Roman, arrives from the West Indies.

Prince's Fund Growing

Subscriptions totalling £300,000 (about \$1,500,000) have already been received at St. James's Palace for the Prince of Wales Jubilee Trust to assist movements benefitting the youth of the country. A woman of 84, a survivor of the massacre of Cawnpore in India, sent 10 shillings, her week's old age pension.

Exports of frozen poultry to Great Britain during the two weeks ended April 6, 1935, amounted to 2,964 boxes, making in all 31,756 boxes, about 1,675,800 pounds, exported to the British Isles since January 1, 1935.

Head Of Soviet Government

World War Gave Stalin Prominent Place In History

A thorough job of cleaning out the war profiteers would land us in the most surprising campaign. For instance there can be little question that by far the biggest war profiteer in the world to-day is the Soviet government in general and Joseph Stalin in particular. If there had been no World War there would have been no Russian revolution. The unlucky Japanese war of 1904-5 shook the Romanoff throne. The catastrophes of 1914-17 sent the Czarist system into the dust.

Communism to-day offers itself to the world as the only hope of peace among the nations. The horrors of war are a favorite subject of discourse at Moscow. But it would be interesting to have Stalin lay hand on heart and say that he wishes the World War had not happened. Absolute power over 170,000,000 people and a prominent place in history are the profits which the World War brought to Stalin.—New York Times.

A Super-Gear Shift

Has Over 11,000 Speeds And Four Shift Levels

What would be a nightmare to fourspeed motorists a super gear shift with 11,001 distinct speeds, was put in operation at the California Institute of Technology at Pasadena, California.

The gear shift, probably the most complicated ever assembled, governs the speed on electric motors driving apparatus used to test pumps for the Colorado river aqueduct. It consists of more than a score of toothed gears, with four shift levels each of which may be set in 10 different positions.

Possible pump speeds start at half a revolution a minute and jump by half-revolution steps to 5,000 revolutions a minute.

A new stratosphere balloon is being built in Soviet Russia.

London Woman Was Charitable

Payments Have Been Made From Fund For 124 Years

Annual gifts were made over a century and a quarter ago by a London woman, Mrs. Elizabeth Heather. Nobody knows who she was or anything about her except that she was charitably inclined, but her name is still kept green by her gifts of £10 to six "widows of decayed householders," which have now been made regularly for 124 years. When Mrs. Heather set aside the fund from which these gifts are made there were then, as now, respectable people who, through no fault of their own, had fallen upon hard times, and it was these women Mrs. Heather particularly desired to help. She therefore laid down that recipients of her gifts should be widows of "persons who have been in a respectable position in the world, and paid household taxes, and who from circumstances beyond their control have become poor and needy." She also insisted that applicants should be women of good moral character. The receipt of poor law relief is also an absolute disqualification.

New Telephone Record

Voice Girdles The World In A Quarter Of A Second

Two telephones within 50 feet of each other were linked experimentally by a circuit of 23,000 miles of air and wire. The loop set new time and distance records.

Walter S. Gifford, president of the American Telephone and Telegraph Company, called T. G. Miller, vice-president, his voice girdling the world in a quarter of a second. His call went from New York to San Francisco, Java, Amsterdam, London and back again.

He was relayed over wires to the Pacific coast, broadcast to Java across 9,000 miles of ocean and re-broadcast to Amsterdam, spanning 7,000 miles. From Holland the voice went to London by submarine cable under the North Sea.

Summer Range For Growing Chickens

Clean Ranges Needed For Effective Control Of Parasites

In the almost days when the black death, typhus, smallpox, and other virulent plagues were taken as a matter of course, the phrase "he would not kill a fly" was invented as a very high compliment to personal goodness. To-day, the person who would not kill a fly is looked upon merely as ignorant. The house fly is world-wide in distribution and is notorious for the part it plays in the dissemination of such dangerous diseases as typhoid, infantile diarrhoea, tuberculosis, cholera, dysentery, and others. It breeds in fifth of the most objectionable kind, and yet it is tolerated in many homes, and public eating places. The fly is a menace to public health owing to its habit of passing directly from putrid filth to human food, carrying with it bacteria and other organisms and particles of decomposing organic matter on its hairy body, legs, sticky feet, and mouth-parts. Undesirable organisms may also be conveyed to food in its excreta and regurgitated saliva (fly spittle).

Several generations of house flies develop during the warm months of the year, says the Dominion Entomologist, the number varying with the character of the season. The flies are most numerous in summer and early autumn but diminish rapidly with the advent of cold weather. The most effective and desirable method of controlling house flies undoubtedly consists in eliminating or reducing their breeding places to a minimum by properly treating or disposing of such materials as manure and garbage. Fresh horse manure is a prolific source of house fly production and this material is probably responsible for the majority of flies in rural sections. In the cities, where horses have been largely replaced by the advent of cold weather. The most effective and desirable method of controlling house flies undoubtedly consists in eliminating or reducing their breeding places to a minimum by properly treating or disposing of such materials as manure and garbage. THE TENDERFOOT

By
GEORGE R. RODNEY
Author of "The Colorado Trail",
"The Canyon Trail", Etc.

CHAPTER XVII.—Continued

"Dustin tells a different story," suggested Garcey. "There's the cattle rustled off the Hour-glass. Carr and Gray'll come across there. You better talk to your lawyer, too, Goddard, and get him to tell you what chumpiness is. I'll interest you in that false suit over Soda Springs. You're good for five years at least."

"You listen to me, Garcey. . . . If Sam Dustin says . . ."

But Garcey swept on. "The State isn't especially anxious to get you for rustling. That lies with Joe Carr. What I can do, Goddard, is to promise you immunity for all acts up till now provided you come across with a signed statement of all you know about old man Kane and this man Keene."

Spike breathed hard and considered the iron on his wrist. They were proof positive that Garcey meant business. They had the goods on Dustin. He had always warned Sam that he was biting off more than he could chew. It would not help Dustin in the slightest degree. They had enough on Dustin now to hang him. If they failed to hang him, they would "put him away" for years. In the office-safe there was enough to get away with; a trifle over seventeen thousand dollars, proceeds from the looted cattle from the Hour-glass that no one knew of but himself and Dustin. He studied the three men before him.

"If I make a statement will you promise me there'll be no publicity?" he quavered.

"Sure. That's all right. You'll be subpoenaed later probably as a witness," said Garcey. "All I'm trying to do is to save the County a tremendous outlay. Your affidavit will show Dustin the sense in pleading guilty to second degree murder. That'll save his life. But he'll be locked up for life. . . . That'll mean really about twenty years."

"I . . . I . . . My God . . . I'll give you my affidavit to all facts I know in exchange for your written promise of immunity."

"Get paper and ink. I'll take that affidavit right now. Jamieson here is a Notary Public," said Garcey.

It took nearly an hour to get that affidavit for Goddard knew much more than he realized. Details were set down, fragments of talk that he

had from time to time with Dustin. His threats against Edith and his scheme to hold up Carr. But if he gets out, I'd hate to be in your shoes when he learns of this statement."

Spike Goddard was of the same opinion and the moment Garcey's car shot around a turn in the Seco trail he was the busiest man in Crevasse County. In ten minutes he had the wall-safe opened. In ten more he had packed a valise that he flung into the back seat of the battered little ranch-car. The fat old cook at the Broken Spur was the last man to see him as he stepped on the gas and hurried that car along the open trail to the South.

Armed with that affidavit Garcey and Stone headed straight for the office of the County Attorney where they were met by Masters, the ferret-faced little attorney, who had protected the Broken Spur for many years. Masters scanned the paper and the other proofs that Lorton frankly laid before him.

"Oh, you'll get an indictment of course," said Masters. "And you've got enough to put up a fight. I can say off-hand how well I'll plead. Of course in this case of young Keene; I understand he died. . . ."

"Well he didn't," mapped Stone. "Listen here. I want to get you to investigate the Kane business. I wanted time to look around so I got Epps to give out a report that Keene was dead. I figured that'd make Dustin show his hand and it did. He tried at once to make Edith Carr marry him. He said he'd save her father if she'd marry him. He was perfectly willing to sacrifice Peyott to get the girl. It was quite an accident that we learned that Dustin killed Kane."

"That affidavit would send Dustin up for twenty years even if he hadn't murdered old Kane," said Lorton. "This clears old Carr of course. We might get him over here, Sheriff."

While Carr was sent for, Masters interviewed his client and told him of the affidavit that Goddard had given and for five full minutes Dustin was speechless. Then:

"The . . . He ripped out a vitriolic name. 'He's sent me up for life at least to save his own dirty hide. But he can't get away with it. You tell Garcey that that little crook has jumped the state for the Border. He's certainly taken along with him seventeen thousand dollars that we had in the wall-safe at the Broken Spur."

In ten minutes Sheriff Garcey had the wires red-hot and six hours later action was had when Layton of the Border Patrol wired in that they had picked up Goddard at Willow Crossing on the Big River just as he was preparing to cross into old Mexico . . . and safely. Garcey sought Stone and told him:

"It puts a different complexion on Goddard's status," he said. "I promised him immunity but he did this afterwards. That'll jail him along with Dustin. It ought to help clear up the mess of the Hour-glass too. Let's get back and see old Joe Carr when he learns all that has happened."

Carr, brought from Garcey's house, listened dazedly to the complicated tale. When silence came he leaned forward and scanned Stone closely.

"I don't seem to get this quite straight," he said. "What I want to know . . . How is young Keene? Of course I didn't shoot him but I can't explain what took place. I'd like to call up Edith on the phone and tell her though. She'll want to know. . . ."

"You might tell her," said Stone, "that Gerald Keene will drive out to the Hour-glass with you in a little while. . . ."

"How do you know he will?" mapped Carr. "Can't he answer for himself? For God's sake get him from Doc Epps if he's not seriously hurt?"

"That's all right," said Stone easily. "It'll happen to be able to speak for him because . . . I AM GERALD KEENE."

A bomb-shell falling between them would not have caused more astonishment. When it partially subsided Stone explained.

"Burwell of the Cato bank told me that Dustin and Goddard had systematically looted the Hour-glass. I knew of course that as Mr. Carr's partner, I'd never get a hair of evidence so I took Duro Stone's name. Duro was my foreman on a little ranch I own up in the Wind River basin. I came on down here with a letter from Gerald Keene to Mr. Carr and I got a job as Duro Stone. I saw almost at once how things were going. Mr. Carr and pretty well crippled up and Dustin and Goddard were on the prod. Then I found out about the cattle being swiped by the men from the Broken Spur. . . . I couldn't do much because it would be the only evidence of one man and he a stranger. Then I found out about the gold mine and after that the other things came to light. Of course I knew at once that was trying to force her consent. When Keene . . . I mean the real Stone . . . was shot I had to persuade Epps to give out word of his death. I figured that would make Dustin show his hand and it did. I had to swear out a warrant for Dustin's arrest on the narcotic charge because I needed three days to go up to investigate Peyott Garcey's story about Kane's death and I didn't want to know about it. That's why I had Garcey pinch him. I couldn't have concealed my identity very long though. Crews spotted me. You see, I was told by Mr. Carr. If he hadn't been so crippled that you couldn't get around."

"Does Edith know?" asked Joe Carr.

Stone shook his head. "By the way," he said, "we'd better send for the real Duro Stone. He's getting darned tired of being dead."

In the riotous hour that followed, old Joe Carr's eyes seldom left his recent employee, Duro Stone. He followed every little movement with an interest that was pathetic.

"Now that I know who you are, I can see Peter Vinton in your every move," he said. "I want to see Edith's face when she's told."

"So do I. Let's get out to the Hour-glass right away," said the new Gerald Keene indignantly.

Edith, warned by the telephone was standing on the porch. The sun shining full in her eyes, filled them with a curious light and made a bright nimbus about her head as she stretched out a hand to the new Gerald Keene.

"I hardly know how to greet you," she said half-shyly. "I was prepared to give Duro Stone a warm welcome. . . . Duro Stone who saved my father and me and the ranch but now . . ."

"But now . . . He took the word. 'Let 'em all go in for the house, Edith. I've got something to tell you. . . ."

They watched the others go inside the house and they stood watching the sun set behind the last blue line of the foot-hills. A golden glow seemed to fill the air with an aureate dust and after a coyote set up his shrill weird yelling. Stone, Duro Stone . . . now Gerald Keene, took both her hands in his and drew her to him. She came unresistingly and was drawn into his arms.

"You . . . needn't . . . try . . . any longer. . . . Her voice was muffled as her face pressed to his. "No longer. . . ."

"No longer what, Honey?" "To pose as an amateur," she laughed. Then she backed away from him and looked at him as Frank Crews came out, took one last glance and fled inside the house. The next moment darkness shut down on them and the desert night began.

THE END.

Archaeologists digging at an old Alaskan village have found for the first time wooden canoes made of Eklom.

This Name Means Extra Fast Relief From Pain

An Aspirin tablet starts disintegrating as soon as it touches moisture. That means that Aspirin starts "taking hold" . . . cases even a bad headache, toothache, rheumatic pain, almost instantly. And Aspirin is safe. Doctors prescribe it. For Aspirin does not harm the heart.

Be sure to look for the name Bayer in the form of a cross on every Aspirin tablet. Aspirin is made in Canada and all druggists have it.

Relieve Heart Disease

New Operation Reduces Activity Of

A new operation for heart disease was reported to the American College of Physicians meeting in Philadelphia.

The operation hobbles the thyroid gland, and is one of a series of similar operations. In the last two years toward relieving the suffering of heart victims.

The operation was described by James Alexander Lyon, M.D., and Edmund Horgan, M.D., of Washington. They reduce the activity of the thyroid, one of the body's chief energy producing machines, by cutting down both its blood and its nerve supply.

The arteries running to the gland are tied off, and with them the gland's connection with the sympathetic nervous system. The gland is hobbled, that is, does not entirely stop.

The energizing product it pours into the blood stream, thyroxin, is much diminished. The result is an easing off on the work done by the heart.

The operation has relieved five cases of angina pectoris of their pains. It has relieved three cases of congestive heart failure, a condition when the blood is sluggish.

Changes Their Color

Zoologist Finds X-Ray Has Quick Effect On Mice

Colored mice are now available in St. Louis, in all colors except green, bright blue and orange, and prohibition repeat has nothing to do with it's science. This was announced by Dr. George D. Snell, assistant professor of zoology at Washington University, who has been studying the effects of X-ray in the heredity of mice. A combination of dieting and exposure to the roentgen rays produced the startling colorations and in some instances strange malformations and abnormalities, Dr. Snell reported.

THE RHYMING OPTIMIST

By Aline Michaelis

MY JOY

Joy is not an ordered thing.

Portioned day by day.

For it is joy that for Spring.

That, when storms will stray.

Nature, it is like a bird

Singing, who knows why?

By what winds of fancy stirred

Into melody?

Joy is careless where it dwells.

How it comes or goes!

How it can say what charm impels

Song that heavenward flows?

I had thought my joy was spent.

Fluttered from my hand;

I had sought to find content

In a silent land.

Then upon a golden day,

Fairest, loveliest,

Joy rose, like a lark in May,

Singing in my breast!

The general tendency of more than nine persons out of ten is to spend what they get. If they are spending little, you may reasonably conclude they are making little.

Of all foods, milk has the highest food value.

Our Democratic Sovereigns

Amusing Episode Of Visit Of Royalty 150 Years Ago

To-day the members of the British Royal family are the most democratic. In celebrating the Royal Jubilee the British people feel their King and Queen are not only their sovereigns but their friends. And if this detracts in any way from the romantic atmosphere of royalty it adds infinitely more to the human relationship—a deeper and warmer bond than the merely remote and picturesque.

We could never imagine our King George and Queen Mary permitting such stilted behaviour among their personal friends as was enacted 150 years ago by George III, when he paid what was presumably a friendly call on Mrs. Delany. The visit is thus amusingly described by Agnes Repplier in her charming book "To Think of Tea."

"When the king entered Mrs. Delany's parlour, all its occupants except the hostess backed respectfully to the wall, and stood there at attention." Then Miss Post backed out of the door and brought in two extra candles which she placed on the tables; backed out a second time and brought in two more candles which she placed on the pianoforte; backed out a third time, and brought in

Miss Delany's tea on a large salver with sugar and cream, bread and butter, cake and a napkin. While he drank it she returned to her station by the wall. When he had finished, she took his cup, backed out of the room a fourth time and brought him a fresh supply. It was well he did not drink sixteen cups in Dr. Johnson's fashion, or Miss Post's legs would have given away under her. Of course no one partook of tea with the king. He drank it in his private life . . . and took his departure, leaving a company overwhelmed by a profound sense of his condescension."

Sweepstake Building Burned

Fire In Dublin Destroys Structure Owned By Irish Free State

The Pious building in Dublin, where prizes are drawn in the Irish Hospital Sweepstakes, was swept by fire, rumored to be of incendiary origin.

None of the 300 young women employed in the building were at the time. Many of them later joined the throng of spectators and wept as the walls of the blazing structure collapsed with a tremendous roar.

The elaborately decorated drum from which the counterfoils are taken in the sweepstakes draw was found in the debris, a mass of twisted steel.

The building, of frame and brick construction, was owned by the Saorstat (Irish Free State) government and contained the sweepstakes records. It was situated on Abbey street, near O'Connell. The sweepstakes draw was held on its second floor in a large room once used as a ball room.

Observing Jubilee Year

Tribe In India Promises Not To Steal Cattle

Unless there are backsliders, there will be no cattle stealing by one of Punjab's most primitive tribes in the State of New York. That will be the tribe's gesture honoring King George's silver jubilee.

Responding to the appeal of British Commissioner C. C. Garbett, 100 of the tribe's leaders solemnly agreed not to steal any cattle during jubilee year. The tribe is notorious throughout the Punjab for its cattle rustling.

Trampled To Death

Seventy-Five Beggars Die When Mob Scrambles For Cash

Seventy-five beggars were trampled to death in scrambling for a rich merchant's alms on one of the minor islands of the Bahrain group in the Persian gulf, reports reaching Baghdad stated.

The mass tragedy occurred in a glamorous setting of Oriental extravagance as 2,000 ragamuffins, learning the fabulously wealthy merchant was about to celebrate by showering out money, swarmed to his mansion.

The total quantity of faxseed in Canada on March 1, 1935, was 680,839 bushels, 408,833 bushels being in elevators; 164,800 bushels on farms, and 5,686 bushels in transit. On the corresponding date in 1934, the supply on hand was 663,968 bushels.

Jamaica was discovered by Columbus during his second voyage in May, 1494, and was in possession of by the Spaniards in 1509.

Signs Declaration

MRS. ETHEL DUFF

To benefit others Mrs. Duff, 135 Wellington Street E., Chatham, Ontario, avers to the facts before a notary of how Fruit-a-tives rid her of sick-headaches and stomach trouble in less than a month. Mrs. Duff generously made her statement in this fashion as everyone can be sure of its truth. She states,—"I was bothered with stomach trouble which brought on sick-headaches. Nothing I took did any good. Then I started taking Fruit-a-tives. In less than a month my stomach trouble had gone and I had no more headaches. Fruit-a-tives helped my husband who suffered from stomach trouble too."

Copy of Mrs. Duff's complete sworn statement will be sent on request. Write Fruit-a-tives Limited, Ottawa, Canada.

FRUIT-A-TIVES—SHE AND SHE EVERYWHERE

Little Helps For This Week

The Lord shall preserve thee from all evil, He shall preserve thy soul. Psalm 121:7.

Under Thy wings my God I rest.

Under Thy shadow safely lie;

By Thy own strength in peace possessed.

While dreaded evils pass me by.

A heart rejoicing in God delights in all His will, and is surely provided with the most firm joy in all estates; for if nothing can come to pass beside or against His will, then that soul cannot be vexed which delights in Him, and hath no will but his, not only when He shines bright on them but when they are clouded. That flower which follows the sun doth so even on cloudy days. When the sun does not shine it follows the hidden course and motion of it. So the soul that moves after God keeps that course even when he hides His face, and is content to do His will in all conditions.

Labor Under Handicap

Child With Defective Hearing Or Sight Often Neglected

"There is no child so completely neglected, so completely misunderstood as the child who is losing his hearing," says an investigator. "He does not even understand his own plight, he feels no pain; he only knows the impatience, the hard knocks, the lack of sympathy or the bitterness of being passed over or ignored. There are many thousands of these hard-of-hearing children in the State of New York. Some of them are being discovered through surveys."

A Country's Real Enemies

Are Not Those Which Exist Across Some Boundary

Every nation of the world is laboring under the terrific illusion that its enemies exist across some geographical boundary. We do not slay our enemies when we slay our brothers; we merely multiply them. Hate, fear, ill-will, greed, ignorance, pride, racial and nationalistic bigotry—these are the real enemies of my country, and of your country, and every country.—Dr. Harold Phillips.

Remembered The Nurse

Visitors to the house in the daytime made so much noise that the night nurse could not get sufficient rest to prepare for her work.

One day she happened to mention this to the doctor, who wrote a large notice with the words: "Please remember the night nurse," and placed it on the hall table.

Next evening, when she came on duty, she found, beneath the notice, a shilling, a sixpence, and a few coppers!

Many new railway lines and extensions are being constructed in China.

A porterhouse steak and a medium priced automobile cost about the same per pound.

Culver Calhoun has added a jig saw to his shop equipment.

Mr. and Mrs. Stilwell attended the dance here on Monday night.

Rev. A. D. Currie is driving a new Chevrolet.

U. S. (Buster) Brown of Cremona was a visitor in town on Tuesday.

Mrs. Ed. Clark of Calgary was a visitor in town Wednesday.

Wheat is up and covering the ground on many farms east of town.

C. H. McMillan has bought a Chevrolet car.

Glenn Williams spent the weekend and holiday with his parents at Bottrel.

Miss Loiselle of Innisfail spent the weekend and holiday as the guest of Mrs. G. Y. McLean.

Mr. and Mrs. Ed. Fox, and Mrs. Fox, Jr. were Calgary visitors on Saturday.

Percy Willis and Miss McLeod of Turner Valley were visitors at home of Mrs. S. Willis on Sunday.

Percy Fleming is working over time these days planting trees at his house.

If we cannot get a new telephone exchange here, surely we can get the old building painted.

Frank Low who has been attending Mount Royal College, Calgary, has completed his studies and returned to his home here.

Mrs. Lorne Nichol and daughter Nola returned on Friday last from Calgary, where Nola has been successfully treated for mastoid trouble.

Rev. George Dickson of Toronto, and daughter Mary of Calgary, visited with Jas. Dickson on Saturday.

Mr. and Mrs. H. R. Fitzpatrick and the Misses Margaret and Kathleen Fitzpatrick were Calgary visitors on Tuesday.

A meeting of the Junior U.F.A. will be held at the home of Mr. and Mrs. Allan Montgomery on Saturday evening, May 11th.

Mel. Patmore is enlarging his transfer van so that he can haul larger loads of freight between Calgary and Crossfield.

Bill Murdoch was in town on Wednesday moving the stock of the Bannister Electric to their new location in the Ontkes building.

Wilson Stafford has over 700 acres in, Everett Bills has a like amount in. Seeding in this district appears to be further advanced than in any other part of Alberta.

You can help in the annual clean up by having the accumulation of a year's junk removed to the nuisance grounds before the cop insists that it be done pronto.

Thos. Tredaway and Constable Cameron are visiting the schools adjacent to the town and are presenting the children with jubilee buttons. The snow storm on Monday kept many of the children from getting into the patriotic celebration and the committee are taking this means of distributing the surplus.

Village Council Meeting

The regular monthly meeting was held in the Fire Hall on Tuesday evening. All members present.

The Council decided at a previous meeting to have the power reconnected to the motor at the new skating rink, so that this well could be used in case of fire. A communication was sent to the Calgary Power Co. asking for a reduced rate during the summer months.

A communication was read from the Calgary Power in reply stating that they would reduce the cost to 50 cents a month. The Council accepted the offer.

The remainder of the business consisted of the regular routine affairs of the village.

Bedding Out Plants

Please your orders with Wm. Laust for bedding out plants and get Bill Brown's, they never fail to give satisfaction. Cabbage and cauliflower a specialty. Tomatoes, celery and a large number of different kinds of flowers will be ready around May 15th.

ALONG BROADWAY
 Dick Roberts well-known buyer of fox meat horses, and former Banff guide, has gone Social Credit. Ben Mabeyle of the Delacour district, is a strong supporter of the Aberhart plan—he has also convinced his wife that it is the proper guide. Fred Stevens was smoking an election cigar the other day and you could smell it in Carstairs. Joe Demers thinks the present Government is bad enough, but we are going to get something a damn sight worse. While Crossfield and district raised a considerable amount for the Cancer Fund, it is not surprising to note (in checking the lists) that many who could afford to, did not give a penny. Austin Williams is now engaged in the life insurance business and it appears that the big boy is making good. Ray Gilechrist is taking life more seriously since joining the benedictines. G. Y. McLean is not the singer he used to be, but he is a good saxophone player. Col. Calhoun has no bad habits—he does not drive a car or run a radio. Happy McMillan is still single although he has refused several proposals. Tom Goidle is now a full fledged distiller. Wm. Landum is a good social drummer. The Bottrel Orchestra is a greatly improved band since Ken McCreia joined them. Six auto loads of Liberals from the town and district attended the Liberal convention at Cochrane last week. The Fitzgerald and Councilor Shipway got into a very heated argument on Broadway Tuesday—Tom objects to the Wednesday half-holiday and he met with plenty of opposition and no fooling. One of our highly respected citizens was very incensed the other night, which of course is not news, but when he slid into the back seat of his car and thought he was behind the steering wheel, it is front page copy.

Thurs., May 9th, 1935

LETTER TO THE EDITOR

Cochrane, Alta.

May 4th, 1935

The Crossfield Chronicle

Dear Sir:

After reading the letters I have received from the supporters of the Aberhart Taxation Scheme tearing me to pieces for my letter which appeared in your issue of April 25th, I am still in favor of Real Social Credit.

To the writers of the letters received to date, I may say that I have not put up one single argument that is based on facts or that will stand an examination. On checking up on you I find that nearly all of you are in the 30 per cent class that I mentioned in my previous letter who would benefit by the basic dividends (even if it were possible to pay this dividend) at the expense of your neighbor who is making a greater effort than you. One writer was a real braggart, not even signing his name. His abuse was perfect. His God the promise of \$25 per month. His threats were cheap and it is safe to understand from the tone of his letter your printing press and myself will be in the hot place if individuals of this type ever get in control of this province.

Have you supporters of this taxation scheme studied it from A to Z? Do you understand the theory of this scheme sufficiently to try to fit it into practice in Alberta? I would advise you to get the necessary facts and try for your own satisfaction to picture this theory in practice. I am sure you will then turn your back on this taxation scheme.

The fact that Mr. Aberhart and his supporters do not accept the invitation of the legislature to draft a plan for the examination of the legislature and the people of this province shows a great weakness. If this scheme is so attractive, so essential to the welfare of our people, so bullet proof, so above criticism that it will bring prosperity over night, why not give us a definite plan?

The fact that Mr. Aberhart has refused to let his speakers publicly debate on his taxation scheme the merits of same, clearly shows that he does not want his supporters to hear his pet scheme intelligently examined. It also shows us clearly that it is not backed by the essential facts to warrant its approval.

Yours very truly,

P. H. Swanson

Dance Saturday Night

Another popular Saturday night Dance, May 11th. Featuring the Elimination Waltz Contest. Music by the Gloom Chasers.

NOTICE

To the Shareholders of the Crossfield Mutual Telephone Co.

In future there will be no individual telephone bills sent to each subscriber as in the past, and it will be appreciated that all rentals be paid not later than the 25th of each month at the office of the Secretary.

T. Tredaway, Secretary.

Bush League Opens Sunday

The Bush Baseball League which has functioned successfully for several years, opens for the season on Sunday, May 12th. Five teams make up the league, Dog Pound, Water Valley, Cremona, Bottrel, and Atkins.

The schedule for the season has been printed and may be secured from the Secretary of the League, E. R. Hepper, Dog Pound.

Following are the league games for the month of May.

Sunday, May 12
 Water Valley at Atkins
 Bottrel at Cremona

Wednesday, May 15
 Dog Pound at Bottrel

Sunday, May 19
 Bottrel at Water Valley
 Atkins at Dog Pound

Wednesday, May 22
 Cremona at Water Valley

Sunday, May 26
 Water Valley at Dog Pound
 Cremona at Atkins.

Farwell Departing Citizens

About fifty of the members of the United Church met in the Masonic Hall on Wednesday evening to pay tribute to Mr. and Mrs. W. Gibson who are leaving the first of the week to take up residence in Olds.

The evening was spent in community singing, games, etc. Refreshments were afterwards served during which Wm. Strain in a few well chosen remarks called upon Mr. Gibson to make the presentation.

He spoke of the esteem and goodwill of the people of the United Church. Rev. E. Longmire spoke of Mr. Gibson's work both in the Sunday school and the choir. Mr. Gibson suitably responded.

The singing of "Blest be the tie that binds" brought a very enjoyable evening to a close.
